PARTNERSHIP FOR LIFE 2018

LATTER, OSLO AKER BRYGGE

14. FEBRUAR 2018

Partnership for Life 2018

Innovation and value creation within the life sciences demand excellent science, quality healthcare services and a culture for public-private research projects. Competant capacity, skilled business development and competent people. An ecosystem that embraces this achieves high competitiveness and results in benefits for patients, society, and businesses.

We welcome you to join us for a day where we will present the Norwegian life science ecosystem, discuss the importance of collaboration, look at global success stories and challenge Norwegian decision and policy makers on their ambition and execution.

Find your future partner!

For the first time at P4L we will organize a one-to-one meeting session where we invite companies, startups, investors, and academia. The session is facilitated by Inven2. [Sign up for partnering meeting](#)

- Expand your knowledge
- Exchange competence
- Extend your network
- Identify possible areas for collaboration

We welcome you to participate in Partnership for Life 2018, part of Oslo Life Science 2018. [Sign up for registration here](#)

The moderator through the day will be: **Anne Grosvold**
